EXPERIENCE

Lekir Tech (M) Sdn Bhd <i>AI Automation & Full-Stack Developer Intern</i> - Engineered AI Agent Orchestration workflows using n8n, successfully integrating LLM and LAM models into live production environments. - Collaborated with MPC to deliver 4 specialized automation workflows for Mydin (HR, Marketing, Customer Service, and Operations), integrating workflows with their Lark ecosystem. - Led technical requirement gathering and mapped logic blueprints for an HR Digital Worker presented to the IJN Board of Directors to automate operational bottlenecks. - Maintained the LekirCash fintech ecosystem, managing secure full-stack updates, transaction flow UX via Adobe products, and version control via Git/GitHub.	Cyberjaya, Selangor Sep 2025 – Feb 2026
Texas Chicken <i>Line Cook (High-Volume Operations)</i> - Maintained high operational standards in a fast-paced, high-pressure environment, ensuring 100% compliance with rigorous hygiene and safety protocols. - Optimized workflow efficiency during peak service hours to meet strict service-level targets, demonstrating the same discipline required for technical project deadlines.	Bangi, Selangor 2022 – 2023
Family Agro-Enterprise <i>Operations Assistant – Production & Supply Chain</i> - Facilitated end-to-end production cycles for traditional food products, ensuring quality control and consistency across manufacturing workflows. - Managed resource allocation and agricultural maintenance tasks, gaining early exposure to logistics, supply chain efficiency, and inventory management.	Tanjung Karang, Selangor 2016 – Present

PROJECTS

SewaTani.com Agricultural Machinery Rental System Full-Stack Developed and hosted a full-stack web platform using real-time availability logic.	Jan 2025 – July 2025
Sportify Court Booking System PHP, MySQL, cPanel Managed Scrum workflow and coordinated with team during sprints to deliver a futsal booking system.	Oct 2024 – Jan 2025

ACHIEVEMENTS

Gold Medal JIICaS 2023: Java Learning App with Visualization Built a mobile app to visualize Java code execution through animated flowcharts.
Double Gold ICCI 2020: Babyfond Smart Baby Stroller Programmed Raspberry Pi for real-time sensor control and obstacle detection.
